#### · 7.2 Conditions for safe storage, including any incompatibilities

##### · Storage:

##### · Requirements to be met by storerooms and receptacles:

Store only in the original receptacle.  
Store in a cool location under dry conditions in well sealed receptacles  
Do not store in gangways or stairways.  
Observe official regulations on storing packagings with pressurised containers.

##### · Information about storage in one common storage facility:

Do not store together with oxidizing and selfigniting materials.

##### · Further information about storage conditions:

Store in a cool place. Heat will increase pressure and may lead to the receptacle bursting.  
Do not store together with oxidizing and self-igniting material.

### SECTION 8: Exposure controls/personal protection

· **Additional information about design of technical facilities:** No further data; see item 7.

#### · 8.1 Control parameters

##### · Respiratory protection:

Short term filter device:  
Filter P2

##### · Protection of hands:

Preventive skin protection by use of skin-protecting agents is recommended.  
The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.  
Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

##### · Material of gloves

Nitrile rubber, NBR  
Recommended thickness of the material:  $\geq 0.5$  mm

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

##### · Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.
